## REAL WOOD IMITATION BOARD

Molded polyurethane

- Original replica, with a real and natural wood look
- Very resistant and smooth material surface
- Can be easily painted over with acrylic or water-based wall paint
- Solvent-free, CFC-free, environmentally friendly
- Glue consumption: approx. 56 g/m

### APPLICATION AREAS

- To design cozy and modern spaces
- "Real": looks like an old wooden beam
- It is also ideal as decoration for restaurants, offices, pubs, hotels, etc.
- Kitchen, bedroom, living room, guest room, ballroom and more.

**Material:** It is a rigid integral foam based on polyether polyols and diphenylmethane diisocyanate (MDI), with approximate density of 120 kg/m<sup>3</sup>.

**Temperature resistance:** -30°C to 90°C. **Moisture absorption:** up to 3%

**Characteristics and resistance:** HOMESTAR decorative boards do not have any structural function, they are only decorative elements. They can get wet, as they are resistant to humidity and are also immune to all pests and termites.

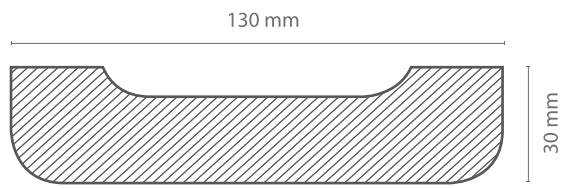

**Easy assembly:** Before starting work, make sure that the surface is clean, stable, dry and as smooth as possible. Our decorative boards are particularly easy to assemble. Cut to the desired length, with the our HOMESTAR saw, and apply our Multipurpose glue to the back of the board, then press the PU board firmly against the wall. Remove any glue residue immediately with a damp cloth to avoid unsightly stains.

**OBS. SUBJECT TO SMALL COLOR VARIATIONS.**

**NOTE:** A tolerance margin of 5% must be considered for dimension and weight and +/- 5mm for length.

MADE IN GERMANY
