

TECHNICAL DATA SHEET

MODERN CROWN MOLDINGS

Polystyrene Extruded Crown Moldings

Identification: The HOMESTAR brand and the references are printed on the back of the crown.

Material: High density (70 kg / m³) polystyrene extruded, white, non-toxic, without CFC or HCFC.

Surface: Smooth satin finish with the ends cut at 90 degrees, the back of the crown molding is grooved for better bonding.

Dimension: Length of the Crown Molding: 2 m.

Glue: Use a solvent-free, water-based glue.

Finish: Use an aqueous base and solvent-free inks.

HD CROWN MOLDINGS

Polystyrene Extruded Crown Moldings

Identification: The HOMESTAR brand and the references are printed on the back of baseboard/chair rail molding.

Material: High density (500 kg / m³) polystyrene extruded, white, non-toxic, without CFC or HCFC.

Surface: Smooth satin finish with the ends cut at 90 degrees, the back of the baseboard/chair rail molding is grooved for better bonding.

Dimension: Length of the Crown Molding: 2 m.

Glue: Use a solvent-free, water-based glue.

Finish: Use an aqueous base and solvent-free inks.

PRESTIGE CROWN MOLDINGS

Polystyrene Molded Crown Molding

Identification: The HOMESTAR brand and the references are printed on the packaging.

Material: High density (55 kg / m³) molded polystyrene, white, non-toxic, CFC-free and HCFC foam.

Surface: Smooth satin finish with the ends cut at 90 degrees, the back of the crown molding is grooved for better bonding.

Dimension: Length of the Crown Molding: 2 m.

Glue: Use a solvent-free, water-based glue.

Finish: Use an aqueous base and solvent-free inks.

MADE IN GERMANY
